If Mobile –

health insurance on your smartphone!

For your convenience, If P&C Insurance has developed a new application If Mobile, which offers a contemporary, fast and secure If health insurance service. From now on, instead of a plastic card, you'll be able to use the If Mobile health card on your phone.

Use if mobile instead of a plastic card

By presenting your If Mobile health insurance card together with your ID card or passport at contractual institutions, payments will take place automatically as before.

### Apply for reimbursement and keep track of applications

You can simply submit your claim using If Mobile by taking a photo of the receipt and other documents. Check out your claims history and the status of your submitted receipts simply and conveniently using If Mobile.

View your program and limits

On the application, you can always study the health insurance terms and conditions, a description of your program and keep track of used and left limits in your program.

Use additinal services

In the section Services you can call and have consultation with Doctor online or open your laboratory health tests results from E.Gulbja laboratorija.

Please note!

Which smartphones does if mobile work on?

In order to ensure a high level of data security, If Mobile has been developed using the latest technology. Accordingly, the application is currently available on Android smartphones with operating system version 6 and newer, iPhone smartphones with iOS operating system version 12.2 and newer (starting from iPhone SE, iPhone 6). If the application is not available, you can use the plastic insurance card as before. Apply for compensation at mans.if.lv and use all the website's capabilities.

Your data security

If Mobile is a secure data storage and exchange platform, where sensitive data regarding your health including laboratory health test results is processed in compliance with the requirements of the regulation. The first time you get authorization, use your Internet Banking login. After this, authorization will no longer be necessary – opening the application will be enough. In order to confirm various actions on the application, enter the security code.

How to start using if mobile

- Download If Mobile to your phone from the App Store or Google Play
- Make sure that the passcode or phone PIN code is set on your phone.
- For authorization, use your Internet Banking login or eParaksts Mobile the first time.
- Study the If health insurance terms and conditions.
- Create your If Mobile security code.
